## CMC Rebar Building Abatement & Demolition

Exterior asbestos paneling (shown below left) was fully removed prior to demolition.

BEFORE

AFTER

## Heavy Demolition

### Details:

- Owner: CMC Americas Abatement
- General Contractor: NA
- Project Name: CMC Rebar
- Location: 1344 Ballentine Blvd., Norfolk VA

### Description:

This job called for abatement removal and disposal of friable and non-friable materials, followed by complete heavy demolition of the building. Non friable materials removed included floor tiles and mastic, exterior cement board, asbestos wall shingles, and twenty-four friable fire rated doors. Four men with boom lifts executed the work, in conjunction with fork lifts, one panel at a time, safely lowered and disposed. Heavy demolition removed and disposed of three warehouses and an office building totaling 64,074 square feet.
