Select Demolition CNU Library

Heavy & Select Demolition

Details:

- Owner: Christopher Newport University
- General Contractor: W. M. Jordan
- Project Name: CNU Library Phase II
- Location: 1 Avenue of the Arts, Newport News, VA 23606

Description:

The CNU Library required both heavy and select demolition, covering an area of 12,500 square feet, while carefully segregating areas to be demolished from existing structures. Select demolition removed all brick veneer in the atrium to allow for expansion into a new addition. Several hundred automated bookshelves were intricately removed for preservation and use elsewhere. Macsons crews built protection walls to separate working areas from demolition areas. 6,000 square feet of demolition required extensive structural shoring to protect remaining roof from adjacent roof and slab removal. All work was done in and around working school hours, requiring noise control and non-interference with operation of the building, and safety precautions employed.
