Renovation of St. Pius Catholic School

Although a relatively small job, all aspects of Macsons' services were utilized.

Demolition & Abatement

Details:

- Owner: St. Pius Catholic School
- General Contractor: McKenzie Construction
- Project Name: Renovation of St. Pius Catholic School
- Location: 7800 Halprin Road, Norfolk VA 23518

Description:

This job involved all aspects of Macsons services, including heavy and select demolition, as well as abatement. Special consideration was given to the removal and temporary enclosure of all window openings in the school, which required close coordination between Macsons crews and the glazing contractor. Because of contaminated caulk removal from windows, and a critical deadline to complete work by school opening, crews from all divisions were tightly coordinated for contractual requirements. Three crews were on site at all times during the job, to remove 1000 LF of Exterior walls and 1500 SF of AB removal, in addition to selective demolition of rooms and openings for new mechanical. The job was completed ahead of schedule with no issue.
