Select Demolition-Abatement / Whittaker Memorial Hospital

Abatement of a 30 year old building restored from severe water damage.

Demolition & Abatement

Details:

- Owner: Whittaker Development II, LLC.
- General Contractor: Mark-Turner Construction
- Project Name: Whittaker Memorial Hospital
- Location: Newport News VA

Description:

THE ABATEMENT of this 64,000 SF building involved mass contaminated debris cleanup due to severe water damage throughout. Working around collapsed walls and ceilings, everything from thermal system insulations to flooring materials to ceiling textures was abated. Crews worked through weekends in order to complete the full job scope on time, and make the building accessible for other grades.

DEMOLITION entailed the removal of all elevators, steel boilers, HVAC systems, plaster walls and concrete elevation pads. Implementation required multiple miniature excavators, skid steers, torches, and special applications throughout the building, in order to handle unique challenges on each floor.
